Blake's A-list makeover

Gossip Girl star Blake Lively has worked hard to join Hollywood's in-crowd – breaking out of her TV role with flicks like *The Town* and *Green Lantern* – but she's made a lot of changes along the way. With head-turning features that have landed her two *American Vogue* covers, Blake looks very different from the teenager who entered the industry at the age of 17.

While some starlets overdo their 'little helpers', Dr Joseph Hkeik, of All Saints Cosmedial Clinic, thinks Blake's makeover is a great example of someone who has perfected her looks. 'She looks very natural and her features are in harmony with her face and body. She looks spectacular!' he tells *OK!*

The fashion industry has also taken note, with the star sitting in the front row at runway shows with *US Vogue* editor Anna Wintour – and also making personal calls to shoe legend Christian Louboutin and Chanel designer Karl Lagerfeld for advice on her outfits. 'She's a kind of American dream girl,' Karl says. 'She's full of life. Everyone fell in love with her.'

RHINOPLASTY? WHO NOSE...

Although Blake says she 'doesn't know' if she's had work done, Dr Hkeik says, 'It appears she has had a rhinoplasty. Her nose profile is slimmer.'

AFTER

POSSIBLE BOOB BOOST

While she was only a teen when she began acting, Blake seems to be much bustier now. 'Her breasts are moderately larger now. The procedures are done very well and add to her beauty,' Dr Hkeik tells *OK!*

A NEW SET OF TEETH?

Blake's personal dentist, Laura Torrado, says it takes more than brushing to get that smile. 'You need to start with a white foundation and then maintain it with trips to the dentist for whitening treatments,' Laura says.
