# Face it, Fergie!

The Black Eyed Peas frontwoman Fergie is facing a fresh spate of plastic surgery rumours, thanks to her noticeably smoother complexion and plumper pout. While the 36-year-old has remained tight-lipped on the subject, her hubby, Josh Duhamel, 38, has blasted the surgery claims, saying, 'She's the same Fergie... I sleep right next to her every night.' However, Dr Joseph

Hkeik, of Sydney's All Saints Cosmedical Clinic, believes the singer may have indeed had some work done. 'Fergie seems to have used Botox to reduce the widening or swelling of the face at the angle of the jaw,' he tells OK!. 'Also, she is maintaining her plump lips with fillers and most likely had some filler in her cheeks to help reshape her face and give her a slimmer look.' Hmm...

Tori Spelling, 37, has finally confirmed what OK! had suspected - she's expecting her third child with 44-year-old hubby Dean McDermott!
